

Midtherm Update Regarding COVID-19-

16 Mar 2020

In response to the current COVID-19 situation in the UK, we would like to take this opportunity to reassure you that Midtherm has already taken a number of precautionary actions to ensure that we can continue offering the best service for you and your business whilst keeping our team safe.

We are operating as normal and have so far had ZERO suspected cases of Coronavirus in the business. We are following advice given by Government, WHO and Public Health England on efficient ways to contain the virus and will continue to operate as normal; we will communicate if any changes occur.

We have a team who are monitoring the situation regularly and meeting on a weekly basis. Risk assessments will be completed to minimise risk to employees, customers and suppliers.

We are reviewing policies and procedures on health reporting, office and personal hygiene protective equipment.

Throughout the business we have multi-skilled staff who can fill in for absent colleagues so we can continue to operate. We have hand-wash/sanitiser/wipes readily available across the business for our team to use and are encouraging our team to follow the best hygiene practices as recommended by the World Health Organisation.

To confirm, so far, we have had zero suspected cases of Coronavirus we are monitoring the situation very closely. We will continue to monitor and review the situation for the benefit of everyone we have contact with.

Kind Regards,
Midtherm Flue Systems
