

Spring News and Flues 2018-

03 Mar 2018

Welcome to our spring edition of News & Flues! We have had a busy start to 2018, planning to celebrate our 50th Anniversary in style at this years Hearth and Home exhibition! We began developing a new price list at the start of the year which is due for release soon, using customer feedback we have made it easier to read. New products have been introduced to our Vitrelux range and don't forget to call our sales team to hear about our current offers!

Pot Hanger c/w Gas Cowl - It is designed to support the gas liner from the existing chimney pot, at the same time enabling flue gases to escape whilst keeping birds and rain out.

Vitrelux Offset-

An attractive and cost effective method of obtaining a neat looking offset; when it is difficult to align the stove outlet with the connecting flue system.
